Ex Parte Presentation**

Dear Ms. Dortch:

On August 30, 2018, Mark E. Crosby, President and CEO, and Robin Cohen, Vice President Regulatory Affairs and Spectrum Strategies, both of the Enterprise Wireless Alliance (“EWA”) and undersigned counsel for EWA, met with the staffs of the Public Safety and Homeland Security Bureau and the Wireless Telecommunications Bureau listed below. The parties discussed the following FCC proceedings:

PS Docket No. 13-42: EWA again emphasized the problems being experienced by EWA members and other “T-Band” licensees because of the “freeze” on the acceptance and processing of applications for 470-512 MHz channels, except those that satisfy certain restrictive criteria. EWA urged the Bureaus to modify the freeze consistent with the recommendations in the Land Mobile Communications Council April 2018 Request for Freeze Modification.

WP Docket No. 16-261: EWA advised the Bureaus of the agreement among Frequency Advisory Committees intending to coordinate 800 MHz Expansion Band and Guard Band channels to issue a Request for Proposal seeking a third party to manage the queueing process for those applications. The Bureaus asked to be kept apprised of the status of that effort. They also confirmed that WP Docket No. 15-32, addressing the proposal to permit the licensing of 800 MHz interstitial channels, was being incorporated into this proceeding.

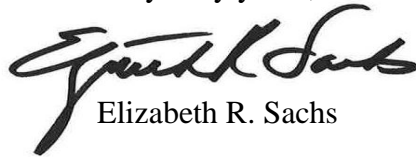

WT Docket No. 17-200: WTB confirmed that this proceeding is under active consideration but offered no estimation for when action might be taken.

GN Docket No. 17-258: EWA described the recent activities of the IIoT Coalition, of which it is a member, whose members seek to retain some amount of census tract PAL licensing in the 3.5 GHz band.

This letter is being filed electronically, in accordance with Section 1.1206(b) of the Commission's Rules, 47 C.F.R. § 1.1206(b), for inclusion in the record in these proceedings.

Kindly refer any questions or correspondence regarding this matter to the undersigned.

Very truly yours,
